

NESTORIUS FANELAMA ZAMILI

Platform Engineer (Production & Reliability)

Jakarta, Indonesia | nestorzamili@gmail.com | <https://zamili.dev>

GitHub: github.com/nestorzamili | LinkedIn: [linkedin.com/in/nestor-zamili](https://www.linkedin.com/in/nestor-zamili)

PROFESSIONAL SUMMARY

Platform Engineer focused on maintaining reliability of production systems in financial environments, with hands-on experience in incident handling, system recovery, and Kubernetes-based service operations across distributed systems.

WORK EXPERIENCE

PT Boer Technology

Jakarta, Indonesia

Site Service Engineer (Platform Operation)

Jan 2022 – Present

- Managed and supported multiple production systems within the BRI ecosystem, covering payment platforms, corporate web services, and internal operational tools, ensuring high availability and reliability (e.g., BRIMOLA, BRI Smart Billing, WebCorp)
- Handled production incidents across distributed microservices and Kubernetes environments, performing root cause analysis and recovery actions to minimize service disruption
- Executed deployment, patching, and rollback processes for critical systems, including transaction and payment-related services in production environments
- Participated in release readiness (table-top) and coordinated cross-team deployments to ensure safe rollout and operational stability
- Troubleshoot CI/CD pipelines (Jenkins, Bamboo), including agent configuration, dependency setup, and secret management integration (e.g., Conjur), improving pipeline reliability
- Investigated and resolved data inconsistencies, including payment status mismatches and reconciliation issues across systems
- Monitored system health using Grafana and ELK stack, responding to anomalies and supporting critical operational events (e.g., switch-back activities)
- Designed and implemented monitoring and alerting systems using Zabbix to proactively detect anomalies and reduce incident response time
- Built and maintained automated reporting tools (e.g., end-of-day reporting systems), reducing manual monitoring effort and improving operational visibility
- Collaborated with application and infrastructure teams to ensure deployment readiness, configuration correctness, and production stability

PT Satunol Mikro Sistem

Jakarta, Indonesia

Field Engineer Telecom

Aug 2018 – Jan 2022

- Commissioned and supported telecom infrastructure systems for production use.
- Gained hands-on experience handling mission-critical systems and on-site troubleshooting.

PROJECTS

Naoto — <https://naoto.id> | Fullstack Personal Project

- Designed and developed a collaborative platform for managing and exploring family relationships (genealogy system)
- Modeled complex relational data structures to represent lineage, hierarchical relationships, and interconnected family graphs
- Built backend services to support relationship queries, ensuring data consistency and scalable data handling
- Designed system architecture with focus on maintainability, extensibility, and future feature growth
- Focused on usability and clarity of relationship visualization for end users

Tech stack: Golang, Vite, Astro, Redis, Docker, GitHub Actions, PostgreSQL

Prakarsa — <https://prakarsa.id> | Personal Project

- Developed the frontend using Next.js for a production-ready web application.
- Integrated frontend and backend services and configured application runtime behavior.
- Automated build and deployment using GitHub Actions and containerized services with Docker.
- Operated the system in a production-like environment to observe performance and failure modes.

Tech stack: Next.js, Redis, Docker, GitHub Actions, PostgreSQL

TECHNICAL SKILL

- **Platform & Infrastructure:** Kubernetes (on-prem), Helm, Docker, Jenkins, Bamboo, GitHub Actions
- **Application Development:** Node.js (Express.js), Next.js, TanStack Start, PHP (Laravel), Golang, Electron
- **Monitoring & Operations:** Linux Administration, Bash, Python, Grafana, ELK Stack, Prometheus, Zabbix
- **Cloud & Databases:** Google Compute Engine (VM-based), PostgreSQL, MySQL

EDUCATION

Binus University <i>Bachelor's Degree in Information System</i> GPA: 3.82/4.00	Jakarta, Indonesia <i>Nov 2024</i>
Poltekkes Kemenkes Medan <i>Associate Degree in Dental Assistant</i> GPA: 3.62/4.00	Medan, Indonesia <i>Sep 2017</i>

CERTIFICATION & TRAINING

- Linux Foundation Certified IT Associate (LFCA)
- Kubernetes Administration (Training)
- PostgreSQL Administration
